Bugfixes

INFORMATION

When opening a project with the new version (2022-23.30), projects of previous version (2022-23.20)

are converted and can no longer be opened with the previous version

Single-User

Multi-User

are not converted and can still be opened with this previous version

Single-User

Multi-User

COM Registration

the COM library has been changed and should be registered again
(start the program as ADMIN using „E3.series.exe /register“)

The bug fixes are sorted and listed by designer number(s). This enables you, for example, to easily search for bugs reported to our support office.

Designer-41164	Arrows in the columns indicating the sorting direction in the component table sometimes show the wrong direction
Designer-41231	Crash when updating a connector with inserts that is placed on a hierarchy block and has an empty insert defined as insert
Designer-41343	It can happen that structure node attributes are not taken over during the import of sub-circuits
Designer-41364	An attribute text template symbol that is part of a component can be placed over another symbol from the database tree
Designer-41385	PDF file can only be generated according to structure template when trigger "BeforeExportPDF" active
Designer-41480	DBE: STEP import - E3 locks up when all 2D views should be generated with big STEP files
Designer-41512	Component table locks up after entering filter criterion without corresponding value, then directly closing the table and opening it again
Designer-41639	When disconnecting a wire, the icon "Wire passes a splice" is not reset
Designer-41672	When cut/paste of connected symbols, duplicate wire names might be created despite the "Create unique wire names" setting
Designer-41698	A symbol cannot be copied from a formboard sheet to the DBE
Designer-41716	Reading designfile (*.E3D) is not possible because the maximum number of slots in the design file is exceeded
Designer-41728	Running dimensions missing in PDF file for shared-sheets
Designer-41732	Write CSV file (e.g., from component table) to network drive takes a long time
Designer-41772	No mating connectors displayed in drop-down list after changing pin name on block connector
Designer-41795	Special Unicode character (in specific font) missing in PDF output

Designer-41797	STEP import: colour scheme differs from previous E3 versions
Designer-41800	Item validation prevents signal change
Designer-41824	In terminal plans of version 2021-22.30, not all conductors / wires may be shown
Designer-41839	E3 may crash when placing wires if the connection cross-references to another sheet and there is no unique destination
Designer-41853	COM: Text.CalculateBoxHeightEx() returns inaccurate values
Designer-41890	Placing connectors from a database assembly on a sheet with view number 1 returns error: "E - Error in function cmpgat\get_cmpgat(), ret = 1"
Designer-41901	Message "No free connector pin found" in status bar and error: E - Error in function hnPlugConnect\create_cpst_pingroup_ng(), ret = 48 may occur when connecting with automatic mating connector assignment.
Designer-41916	Variants/options - possibly incorrect display of the attribute value in the device properties.
Designer-41939	If options are also used in an exclusive branch, it can happen that they can no longer be activated
Designer-41952	Display (All variants All options) in the header of E3 is not updated via CTRL-Z (Undo)
Designer-41962	DBE: It may happen that individual (large) STEP files cannot be imported
Designer-41969	Copying an image of the project to a new symbol in the DBE results in error 'E - Error in function bindata\get_bindata(), ret = 1'.
Designer-41998	Crash when querying aliases via script if the name of an alias is contained in an option.
Designer-42001	Options with "Must Exists" flag are displayed incorrectly in the options/variants tree
Designer-42020	DBE - texts are not translated if "Show all attributes" is checked
Designer-42105	In the wire connections of the assembly, wire designations are not translated
Designer-42133	Performance problem when creating or changing fields if many fields (>1000) are in the project

Additionally to the bug fixes we also have added some new / enhanced functionality in this patch

Designer-34933	Com-Call "SaveSheetsAsSingleUser" can control if the multiuser project will be closed
Designer-41895	"ApplicationInterface::SuppressMessages" also provide in "DBEApplicationInterface"
