Bugfixes

INFORMATION

When opening a project with the new version (2021-22.20), projects of the directly previous version (2021-22.13)

are converted and can no longer be opened with the previous version

Single-User

Multi-User

are not converted and can still be opened with the previous version

Single-User

Multi-User

COM Registration

the COM library has been changed and should be registered again
(start the program as ADMIN using „E3.series.exe /register“)

The bug fixes are sorted and listed by designer number(s). This enables you, for example, to easily search for bugs reported to our support office.

Designer-08591	Query when saving after a change in a model whether all components using this model should be updated, although the changes in the model are not structure-relevant for the component
Designer-39514	Settings - Connection - Cores / Wires - move core ends: Selection in pulldown menu in Japanese environment incorrect
Designer-39660	Customize "Context menu" in DBE does not work or must not be offered
Designer-39696	Transformed graphic not displayed correctly after DXF export
Designer-39723	In the tab "Pins" and "Calculation" in the component properties of a block connector, the info column does not contain the connector name.
Designer-39807	Structure blocks cannot be copied
Designer-39890	A crash may occur when editing panel models if specific text fonts are used that cannot be correctly converted as 3D fonts in 3D rendering
Designer-39984	Crash when assigning an assembly component type to a dynamic assembly where the assembly parts do not match
Designer-39991	Better performance when switching options in a project with a lot of formboard tables.
Designer-40020	Workspace configuration saved if a script in E3 crashes and E3 is closed
Designer-40031	Cables may not be merged when importing a subcircuit
Designer-40039	Columns not visible in pin table
Designer-40044	With the COM call 'GetWireHoseTubeStyle' there is no distinction if the wire color is "black" or automatic
Designer-40090	When automatically loading the end brackets of a terminal strip, the first end bracket does not take on the attributes of the structure definition
Designer-40094	Attribute texts (#1000) may disappear on the sheet after switching elements in the tree

Designer-40105	Cavity part component can be deleted even if still used in a component
Designer-40106	Used preview or table symbol can be deleted with <yes>, even though still used
Designer-40122	COM: the call 'GetConnectionIds' returns too many connections
Designer-40124	If the graphic of a mounting plate does not match the size of the mounting plate, cable ducts and mounting rails may not be displayed in the 2D view
Designer-40149	Texts on open terminal plan sheet not updated after moving end terminals in panel or device tree
Designer-40160	Message "I - Region not changed because it differs from database definition" in DBE although the region is identical
Designer-40163	COM: Text.CalculateBoxHeight() returns different values depending on line breaks
Designer-40164	Error message when moving block in tree (if device table is active)
Designer-40165	Performance improvement while connecting in large E3.topology nets.
Designer-40166	DBE - Not possible to create multiple numeric bus pins with same name without closing pin assignment dialog after each change made
Designer-40189	Switch cabinet - Faulty Fill grade calculation in specific cases
Designer-40191	Wire color 0 cannot be assigned
Designer-40195	Import subcircuit: Cores with the same name and with options / variants are renamed during import
Designer-40200	E3.ReportScripts: Table of Contents - Non-translatable texts, date edited and editor missing in output on sheet since version 2021-22.1
Designer-40203	Item validation may prevent import of a sub-circuit
Designer-40224	Defined highlight color does not work for wire connections in control cabinet/panel
Designer-40336	No ascending/descending sorting in device tree for devices in dynamic assemblies does not work

Additionally to the bug fixes we also have added some new / enhanced functionality in this Patch

Designer-39943	COM: New call "Sym.MoveInteractively"/ enhanced Call "Sym.PlaceInteractively" with which an already placed symbol is moved to the cursor and can be placed interactively
